ANNEXURE-III

- ❖ Value Added Course Name : Research Methodology in Botany
- ❖ Date of Commencement -From 01 April 2024
- ❖ Timing -1:30 PM to 3:00 PM
- ❖ Tentative Date of Exam -03 May 2024(MCQs Via online mode)
- ❖ Tentative Course Schedule -01 April 2024 to 2 May 2024
- ❖ Description of the Course:

The Value Added Course: Research Methodology in Botany provides a comprehensive overview of essential research techniques and writing skills tailored to botany students. Covering dissertation and project work, social outreach programs, and research paper writing, the course introduces students to various components such as title pages, acknowledgments, literature reviews, and hypothesis formulation. Through practical exercises, participants learn data collection methods including primary (experiments, surveys), secondary (journals, articles), and tertiary (books) sources. They gain proficiency in organizing data and presenting findings graphically using Microsoft Office tools. Additionally, students develop skills in result interpretation, discussion, conclusion writing, and referencing styles. The course also familiarizes them with the peer review process and prepares them for effective project or dissertation presentations. With a focus on practical application and theoretical understanding, this course equips students with the necessary tools for successful research endeavors in botany.

DATE 01 April 2024

Objectives of this VAC: Research Methodology in Botany

- Develop a research-oriented environment and foster a mindset conducive to identifying research gaps among students.
- Provide guidelines and support for students undertaking dissertation, project work, and social outreach programs.
- Promote proficiency in academic writing among both students and staff.
- Encourage hands-on research activities such as data collection, surveys, case studies, and field visits.
- Cultivate problem-solving skills, the ability to engage in discussions, and the capability to defend one's research.

Outcome of this VAC: Research Methodology in Botany

- Students will be proficient in identifying research topics, setting objectives, determining content, and recognizing research-related terminology.
- They will be capable of producing innovative and high-quality dissertations, projects, and research materials, while also possessing strong research writing and communication skills.
- Students will be skilled in conducting detailed research studies and collecting data from various sources.
- The course will foster critical thinking and decision-making abilities geared toward societal and social development.
